

Drone Garage Updates

11/21/25

Mesh Refining

- Stopped self election upon joining the mesh
 - millis() - lastHB always ended up > HBLOSS causing new nodes to self elect
 - Note: Use meshId numbers starting with 1 (not 0 as thats to indicate no leader)
- Issue in removal of leader not starting a reelection
 - Looks like the mesh leader is broadcasting and other members are receiving but that isnt quite indicated? investigating...

```
[node4] meshId=3 leader=2 me? no lastHB=1033277 now=1034277
[node4] meshId=3 leader=2 me? no lastHB=1034277 now=1035277
[node4] meshId=3 leader=2 me? no lastHB=1035277 now=1036277
[node4] meshId=3 leader=2 me? no lastHB=1036277 now=1037277
[node4] meshId=3 leader=2 me? no lastHB=1037277 now=1038277
[node4] meshId=3 leader=2 me? no lastHB=1038277 now=1039277
[node4] meshId=3 leader=2 me? no lastHB=1039277 now=1040277
[node4] meshId=3 leader=2 me? no lastHB=1040277 now=1041277
```

Mesh Refining

- Issue in removal of leader not starting a reelection
